

iSO
Compressor
Advanced Workgear

DESIGNED FOR YOUR DAILY WORKOUT

HOWEVER YOU WORKOUT
GET MORE OUT OF EVERY DAY

THERMOREGULATION

iSO-Compressor garments quickly move perspiration away from the skin preventing moisture pooling and allowing the body's natural cooling system to work effectively in all conditions. By keeping your body at it's optimum temperature muscles are kept warm, helping to avoid the risk of injury, reducing stress on the heart and maintaining reaction speeds.

REDUCED MUSCLE OSCILLATION

By eliminating muscle shaking iSO-Compressor garments reduce the build-up of lactic acid, the main cause of pain both during and post activity, allowing you to work harder and longer.

INCREASED CIRCULATION

Increased blood flow means faster delivery of nutrients to the muscle and a quicker removal of waste products, allowing you to perform better and recover faster.

INCREASED PROPRIOCEPTION

The body's proprioceptors help you to know where your arm is in relation to your body or your foot in relation to the ground. The close-fitting properties of iSO-Compressor garments create a greater sense of awareness of your range of movement, effectively acting as a second skin and heightening these senses.

INCREASED MUSCLE POWER OUTPUT

The elastic and supportive properties of iSO-Compressor garments deliver increased power output by both aiding the stretch reflex and shortening it's cycle.

LONG SLEEVE

CODE: 9062

- Active Compression Garment
- Made from NylonLycra (80% Polyamide 20% Elastane)

Sizes: S - 3XL

Colour: Black

SHORT

CODE: 9064

- Active Compression Garment
- Made from NylonLycra (80% Polyamide 20% Elastane)

Sizes: S - 3XL

Colour: Black

SHORT SLEEVE

CODE: 9060

- Active Compression Garment
- Made from NylonLycra (80% Polyamide 20% Elastane)

Sizes: S - 3XL

Colour: Black

TIGHTS

CODE: 9065

- Active Compression Garment
- Made from NylonLycra (80% Polyamide 20% Elastane)

Sizes: S - 3XL

Colour: Black
